NEMANJA DRAGUN

SENIOR FULL STACK ENGINEER

nemanjadragun@gmail.com
nemanjadragun.com
Bielefeld, Germany (Relocating to Croatia in 2027)

PROFILE

Software engineer with nearly 10 years of professional experience building scalable web applications, leading frontend initiatives, mentoring engineers, and driving architectural decisions. Specialized in Vue.js and Nuxt.js with extensive experience across enterprise, product, startup, and SaaS environments.

SKILLS

Frontend	Nuxt.js, Vue.js, TypeScript, TailwindCSS
Backend & Databases	Adonis.js, MySQL, PostgreSQL, MongoDB
Tooling & DevOps	CI/CD, GitHub, GitLab, Unit Testing, E2E Testing
Leadership & Soft Skills	Team Leadership, Technical Mentoring, Cross-functional Communication, Architecture Design

WORK EXPERIENCE

Eurowings Digital GmbH – Senior Frontend Engineer

May 2025 – Present

- Leading the architectural migration of frontend applications out of Adobe Experience Manager (AEM) into highly scalable, modern standalone repositories to drastically optimize decoupled release pipelines.
- Serving as the cross-organizational Nuxt.js expert, establishing engineering standards, leading technical workshops, and mentoring engineers to improve product delivery velocity and application reliability.
- Recognized for strong high-visibility performance, accelerating cross-team collaboration, and aligning complex enterprise requirements with frontend best practices.

Egoditor GmbH / Bitly Europe GmbH – Senior Frontend Engineer

Oct 2020 – Apr 2025

- Spearheaded critical Vue.js platform modernization and migration initiatives, enhancing overall code maintainability, improving bundle sizes, and reducing technical debt.
- Actively shaped platform scaling through quarterly planning, comprehensive engineering mentorship, candidate hiring interviews, and strategic frontend technical leadership.
- Successfully navigated organizational acquisition by seamlessly cross-training and adapting to a React/Next.js ecosystem while actively helping the engineering department scale seamlessly from 40 to over 300 employees.

Gauss Development – Senior Frontend Lead Developer

Jun 2017 – May 2020

- Directed full-lifecycle frontend development initiatives and managed an active, high-performing team of more than eight engineers.
- Engineered and rebuilt an entire core CMS platform from scratch in just three months, completely replacing a legacy version that had previously consumed over two years of development time from multiple engineers.
- Accelerated developer performance through deliberate technical mentoring, steered high-impact deliverables, and heavily influenced architectural roadmaps and product strategies.

LEADERSHIP & IMPACT

- Mentored 10+ engineers directly and many more indirectly across multiple organizations.
- Led frontend migrations, architecture decisions, and critical technical discussions.
- Acted as a regular code reviewer and active contributor to engineering and clean code standards.
- Built internal tools and process improvements to streamline developer workflows.
- Worked closely with stakeholders, product managers, QA engineers, and leadership teams to align business goals with technical execution.
- Participated actively in retrospectives, engineering guilds, workshops, and knowledge-sharing initiatives.

OPEN SOURCE & COMMUNITY

- Contributor to Nuxt.js and other open-source initiatives.
- Active mentor and knowledge-sharing advocate through engineering guilds, workshops, presentations, and community discussions.

PERSONAL

Passionate engineer, father of three sons, lifelong learner, fitness enthusiast, and technology builder who enjoys solving complex problems and delivering products used by large audiences worldwide.
